

GRINDING OF HARDWOOD FLOORS

For grinding of wood and parquet flooring, we recommend Scanmaskin 18. Follow these steps to get optimal results; do not forget to vacuum the floor thoroughly between the different steps:

1

If you need to remove the old flooring you should use the **SCRATCH WITH CLAW**.

SCRATCH WITH CLAW

2

For rough sanding, smoothing and old wooden floors we recommend the tool **SCRATCH ROUGH**. You do this even if you have to remove paint or varnish. The result is an even, clean floor.

SCRATCH ROUGH

3

If you followed the previous steps, we recommend you to use the tool **SCRATCH MEDIUM** before proceeding to the next step.

SCRATCH MEDIUM

4

If you already have a flat floor without any coating, this is your first step. Put on the Velcro holders and middle cushion, and then attach the sandpaper. Begin with **SANDPAPER** # 24 or # 40, it is always best to start with a fine sandpaper to optimize the grinding process.

SANDPAPER

Continue and grind with sandpaper #60
Continue with sandpaper #100
Continue with sandpaper #120

The grinded surface is now ready for impregnation with oil or varnish.
