

How to get a

WORLD SERIES FLOOR

There are **THREE** different diamond systems that can each be used to achieve a matte, glossy, or super glossy finish. We call them **WORLD SERIES MATTE**, **WORLD SERIES HF** (High finish), and **WORLD SERIES VHF** (Very high finish). Please keep in mind this is only three common finishes and is not a comprehensive list or specification. To achieve each finish, a few different combinations of metal and transitional tools can be used.

The World Series 400 ceramic is a great tool for transitioning into the World Series resin tools which are used for the final polishing. The transitional steps are very important, as these transform the surface from a rough and open profile into a tight and dense floor.

WORLD SERIES FLOOR (BASIC STEPS)

1.

Start with optional grit of our **WORLD SERIES METAL TOOLS** to achieve desired aggregate exposure. End with a World Series 60/80 grit tool.

WORLD SERIES METALS #60/80

See more on page: 24-25

2.

Continue with the **WORLD SERIES CERAMIC TOOLS**. Start with #80 and end with optional grit, for example #400.

WORLD SERIES CERAMIC

3.

Apply one or more coats of a concrete hardener, for example **SC-PROOF**. Follow the manufacturer's instructions to achieve full coverage of the surface.

SC-PROOF

After the basic steps, you can if you want to proceed to any final step
- HIGH FINISH (HF) or VERY HIGH FINISH (VHF)

REMEMBER

It's very important to choose the right tool based on your concrete floor. With the help of concrete test kit * you get the recommended tool for your floor based on a hardness index!
